**CORPORATE EMERGENCY SYSTEM ACTIVATION**  
**Midtown Manhattan/ 41<sup>st</sup> Street & Lexington Avenue**

This message is for all corporate coordinators with personnel needing to access restricted areas around the midtown Manhattan steam explosion area in New York City.

The CEAS access checkpoint is 41st street and 3rd avenue. Access will begin at 7 a.m.

Coordinators are reminded that they are responsible to internally notify company cardholders requiring access.

Cardholders with access level C and access level B cards will be permitted into the restricted area.

Cardholders are not permitted into designated "hot zones" and are reminded to follow the instructions of police personnel at all times.

Flex card holders must carry a second form of identification, preferably a company I.d.

Cardholders who access the restricted area may still require permission of building management to enter a given facility.
